

## HSE OFFICES AT MERCY CONVENT - BALLYSHANNON

Refurbishment of original school building, demolition and rebuild sections of buildings

**Client: HSE North West, Co. Donegal**

### SUMMARY:

**Value:** €5.0 m

**Architect:** Taylor Architects

**Status:** Stage 2B planning

### Services Provided:

Preliminary Design, Detailed Design

Construction Supervision

This project consists of the refurbishment of existing buildings on College Road in Ballyshannon. This building operated as a school building up until the mid 1990's. The original building was built in the 1860's and is a 3 storey stone building with timber floors and it still retains a lot of the original features.

There is a 3 storey concrete frame extension to the original building. This was built circa 1960. These buildings are to be upgraded and refurbished to accommodate offices, a primary care centre and GP offices. This entails the refurbishment of all of the older building maintaining the vast majority of the original fabric.

Some replacement and upgrading is being out as required. The 1960 building is being refurbished. A new 3 storey link building is to be constructed to ease circulation between the buildings.
