

MOROGORO WATER SUPPLY SCHEME

Rehabilitate and upgrade Water Treatment Plants in Morogoro, Tanzania.

Client: Millennium Challenge Account - Tanzania

SUMMARY:

Value: US \$12 million
Population Served: 200,000+ persons
Procurement: Traditional
Status: Under Construction

Services Provided:

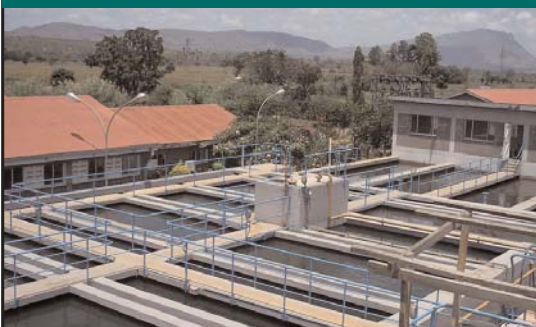

- Review of Detailed Design
- Environmental Supervision
- Water Quality Specialist Analysis
- Construction Supervision

Narrative Description of Project:

Morogoro is in the southern highlands of Tanzania, approximately 190km west of Dar es Salaam. This project will provide an improved water supply to Morogoro City (Population 200,000+) and is funded by the Millennium Challenge Corporation .

The goal of the project is to rehabilitate and upgrade the Mafiga Water Treatment Plant to bring production to 27 MLD from its present maximum of 19 MLD, expand pumping and transmission from the plant, and refurbish/replace the Mambogo water treatment plant, expanding it from 4 MLD to 6 MLD.

The Nicholas O'Dwyer Project Team for this project included a Project Manager / Resident Engineer/, Senior Design Engineer, Assistant Resident Engineer, Land Surveyor, Quantity Surveyor, Senior Environmental Specialist, Water Treatment Specialist, Electrical / Mechanical, Site Engineer and Support Staff - engineers, social specialist, technicians and AutoCAD operators.
