

GEORGES DOCK REFURBISHMENT

Infilling and restoration of the existing dock

Client: Dublin Docklands Development Authority

SUMMARY:

Value: €2.5 million

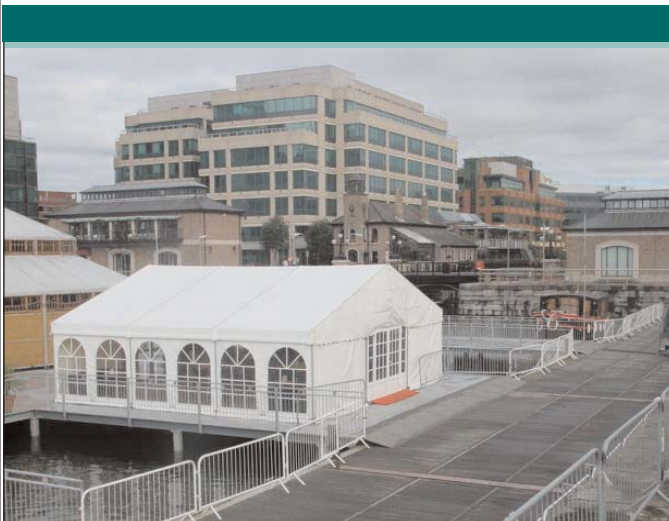

Status: Complete

Services Provided:

Design Schemes

Contract Administration

Construction Supervision

To promote an amenity feature to the Docklands area, it was proposed to infill the existing Georges Dock to facilitate the construction of a platform for public functions.

The existing dock was filled to within 750mm of mean water level. New retaining walls and underground sluicing was provided to enable the inner dock to be drawn down.
