**Status:** Complete

**Services Provided:**  
Design Reports  
Detailed Design  
Tender Documentation  
Construction Supervision

Phase 1 (£7.5m) and Phase 2 (£5.5m)

This 4 year redevelopment of the school commenced in early 2002 and was completed mid 2006.

A selection of single, two and three storey classrooms, technology suite, school meals accommodation, home economics and refurbishment were completed in a phased programme with full access maintained for staff and pupils to the original school.

Low vibration piled foundations were used to overcome difficult ground conditions. Superstructure consisted of a combination of structural steel and load bearing masonry.
